

Sanctity of Human Life Sunday

When we think about the topic of abortion, there will be those who will feel shame and regret. But our God is a loving God, a God of forgiveness and reconciliation.

Question:

Does God create all human life? If so, how do we know?

As believers we should filter every one of life's questions and circumstances through the Bible. We can also Google our questions, especially if we aren't familiar with God's word.

Do we believe the Bible to be true and literal? If so, go to Genesis 1:27: "God created man in His own image; in the image of God He created him' Male and female He created them."

Questions:

What does it mean in the following verses that man has been given dominion over the earth? What does the Bible tell us about boundaries? Do people need boundaries? What about free will? If God forced His love on us, how effective would that be?

So we have free will, but God also does. What are some of His guidelines? Why is choice so important? What can we expect to happen when we go against God's will?

How precious then, is life to Him? Shouldn't we count every life as precious? Why does mankind have such little value for life?

Consider Canaan, the land of milk and honey, the land God gave to the Israelites. Why did He tell them to first go in and remove the false gods and those who were against God? Did you know that babies were being sacrificed to a false god in Canaan before the Israelites moved in?

Statistics:

Forty-six million lives have been aborted in our country in forty-five years. Twenty-six thousand abortions took place in the USA in 2016. But, ninety-nine lives of infants have been saved through our clinic.

So what else can we do to come against abortion?

In closing, read Psalm 139:13-16. We were all uniquely made and purposed before we were born. What does this tell us about an infant growing and developing from the moment of conception in the womb?
